About This Content

Exciting new scenarios, new units, and huge maps await you in Ashes of the Singularity: Escalation's largest DLC yet! Take on the role of a PHC leader and conquer dangerous missions where the odds are stacked against you, or join with the Substrate to repel your PHC oppressors. Engage your enemies on huge new maps, conquer one of the new scenario challenges, and more.

Core Features

New Units

- **PHC Atlas** - This anti-air, anti-drone frigate is an excellent line of defense against Drone Hives. Since it only costs metal and doesn't require radioactives, the Atlas is a less powerful, but inexpensive, alternative to the Apollo cruiser.
- **Substrate Tormentor** - This indirect fire frigate is capable of saturating an area with artillery shells, causing damage to anything in its radius of attack. Although it lacks accuracy and direct single target damage, the Tormentor is at its most powerful against groups of units rather than structures.

New Scenarios

- **Ascension** - The Substrate have developed a prototype experimental Eye of Darkness. Build up your defenses and

survive the onslaught of your enemy in order to destroy the weapon before it wipes you out.

- **Battleline** - A large Substrate army looms across the map, just waiting to attack. Your base is established and ready to go; now, you only need to push out strong units, maintain your resource levels, and survive.
- **Carnage [PHC]** - You're ready to make your last stand against the massive Substrate army. In the biggest scenario to date, face down 7 enemy opponents while also helping your 6 allies stay alive long enough for you to claim victory.
- **Carnage [Substrate]** - You're ready to make your last stand against the massive PHC army. In the biggest scenario to date, face down 7 enemy opponents while also helping your 6 allies stay alive long enough for you to claim victory.
- **Deadlock** - The Substrate are making huge pushes toward capturing valuable Turinium mines. Build up your forces and fight off the enemy before they reach critical mass or overrun you.
- **Entropy** - The members of the Post Human Coalition are attempting to overrun your Substrate base before you gain a critical mass of Turinium. Hold them off at all costs.
- **Incursion** - The PHC have launched an attack on Substrate territory. You have the initiative, but there's no one around to help you - you will have to defeat them on your own.
- **Influx** - Ventrix has tainted the name of the PHC for long enough. Overcome the scarcity of resources and take him out with vicious orbital attacks.

New Maps

- **Battleline** - Medium 1v1 map
- **Entropy** - Large asymmetric 1v3 map
- **Osiris 5** - Large 2v2 with limited choke points through the center
- **Pallavia** - Medium 2v2 with limited choke points through the center
- **Battleline Frenzy** - Medium, single lane 4v4 for combined defenses and huge clashes of forces
- **Galatea** - Large symmetrical 10 player map designed for standard 5v5 games
- **Caldera** - Large symmetrical 12 player map designed for standard 6v6 games
- **Nashira** - Enormous symmetrical 14 player map designed for standard 7v7 games

Absolutely generic and uninspired. Was made to dwell in budles.
Devs should get trading cards, that'll help to "sell" this.

Permanently removing from library.. Well this not exactly greatest experience money can buy :). Really really fun game. took me back to the old need for speed days. basic car (handling) customisations make for a really fun game. Its a pretty old school racer so dont expect much. If you are a fan of racing games and are hungry for something fun and arcade, this is definately for you. <3. A very fun little game, get a group of you together via local play or even stream it via Steam and play like that.. A fun solitaire game with a great story and fantastic artwork ! The theme makes this game stand out from other solitaire games, especially if you like the fantasy genre. Power ups and card styles fit the theme perfectly. There are also hidden object levels scattered throughout that play into the overall story. The level selection map is a great feature and makes it seem like you are on a expedition straight out of Lord of the Rings. If you are looking for a solitaire game on Steam to play, I highly recommend The Chronicles of Emerald.. Great game to familiarize with VR. Enjoyable and funny.. I didn't recieve the DLC. I dont recommend buying this because I didn't get it on my account.

It's a very nice game and can be replayed a lot due to all of the options available. It's also wonderful to see that it's being update regularly from what I can see.. Maybe it's good when out of early access, but now it's just terrible.

Edit: Nvm. Developers abandoned the game.. Fusion of puzzle grid based casual game & tactical rpg. Combats are interconnected with a lot of narrative story telling given via gorgeous artworks comic books style reinforcing the sci-fi universe the game is built upon.. This is a super simple, easy to play game that still can challenge you a bit. Catchy music, cool concept, and a world builder to boot. Fun, cheap, and best of all, it doesnt require much in the way of study or deep thought, lol. A nice break from more complex games.. bad, abandoned, s**t.. If you like to complete your games at 100%, this game is not for you.

In each level you have to collect a certain amount of hearts, using 3 characters, but, due to how the game is designed, sometimes you'll end up dying because of something you did not see. If that happens, you lose a heart and respawn, and that, if you are compulsive as I am, means you must restart the level (because you'll only get 9 hearts out of 10, for example). But the game does not have a level restart button, so you have to go out to the menu and choose again the same level. And to make things worse, when you start a level you have to wait for the 3 characters to come in, and they sure take their time to do so.

In conclusion, if you find yourself wanting to restart a level over and over, the game will annoy you really quickly.. YES THIS GAME IS DEAD NEED TO BRING IT BACK ALIVE IT HAS POTEANTAL.. its amazing
