About This Content

RAAS Professional (Runway Awareness and Advisory System), from FS2Crew, models the aural 'smart landing' and 'smart runway' calls included in the real-world RAAS unit.

These calls offer improved situational awareness for pilots in an effort to help reduce the risk of runway incursions and accidents by providing aural alerts during taxi, take-off, final approach and landing/roll-out operations.

User options give control over RAAS and allow for complete customization to match specific needs.

The software is professional grade, highly configurable, and is ideal for power users who want to model airline-specific options and who want maximum control over how RAAS functions in FSX: Steam Edition.

Full Aural Modelled

- Approaching runway
- On runway
- Taxiway take-off warning
- Insufficient runway

-
- Extended holding on runway

 - Long landing

Title: FSX: Steam Edition - RAAS Professional Add-On

Genre: Simulation

Developer:

FS2Crew

Publisher:

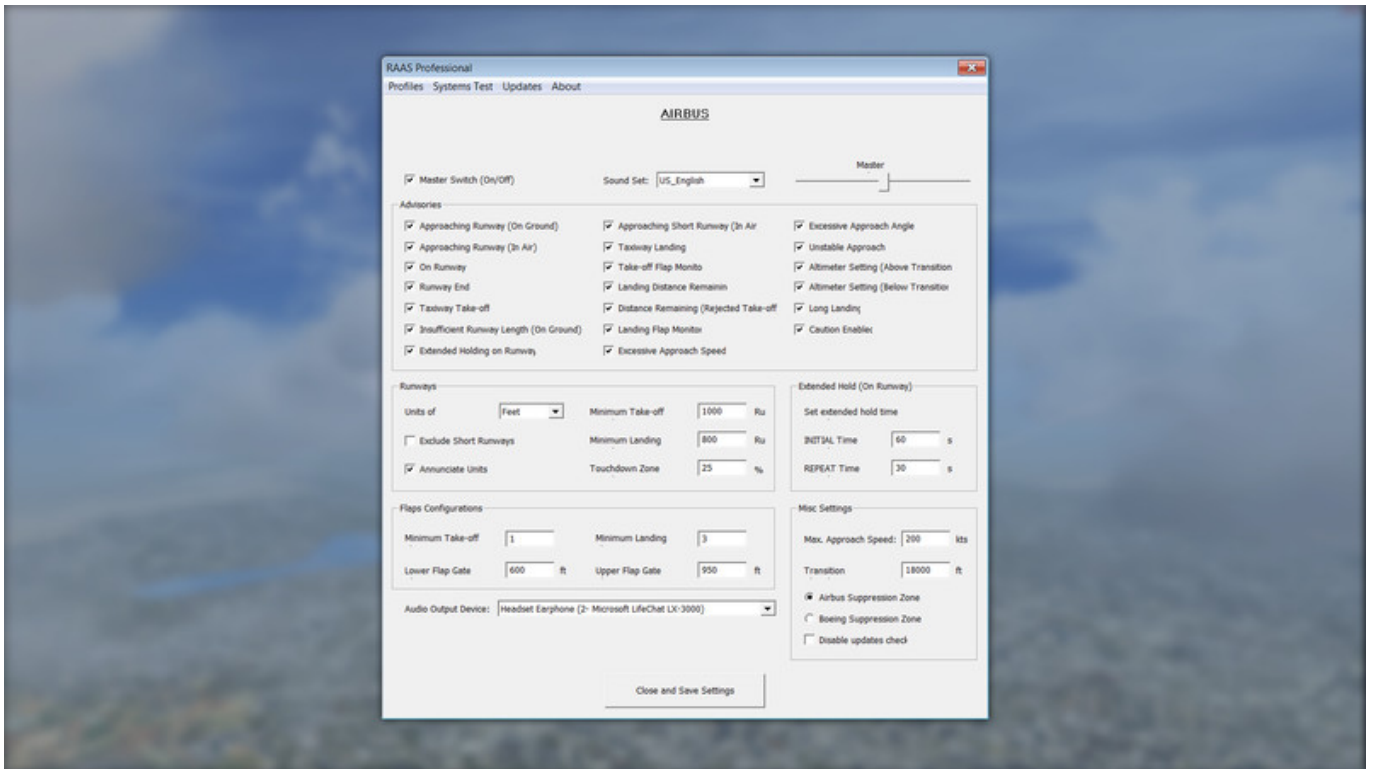

Dovetail Games - Flight

Release Date: 3 Nov, 2015

a09c17d780

English

"50 - 40 - 30 - 20 - 10... Long landing, long landing."

I need help getting the activation code for RAAS Professional Add-On. I paid and down loaded the add on
On Dec. 3 2018 . By mistake I copied the wrong code so I can't activate the program. I asked if I could return the add-on and
put the money in my wallet so I could purchase it again and doing so would get the correct activation code. (GET THIS.)
I was told that too much time was used playing the game?????? How could I have played the game when I couldn't activate it. I
kid you not.
